PROFESSIONAL EXPERIENCE

Tea.xyz (Remote) - Open-Source Software startup, 1.5M users Mar 2024 – Present

Senior Full-Stack Developer

- Worked with third-party vendors to integrate the latest tech solutions to meet product requirements.
- Completed a full overhaul of the app's front-end.
- Rebuilt the backend APIs to optimize transaction cost.
- Implemented a voting system that allows users to vote on proposals.

Productfy (Remote) - B2B fintech platform for corporate card management Jan 2023 – Feb 2024

Senior Full-Stack Software Engineer

- Developed the MVP of a digital bank web application for 10k users, utilizing Next.js for the front-end and a Golang API for the back-end.
- Partnered with the risk management team to automate the intake of financial transaction data with Unit21 API.
- Deployed batch jobs on AWS Lambda as part of the effort to remove legacy code.

Rainmaker Games (Remote) - Gamers social platform startup Feb 2022 – Jan 2023

Lead Software Developer

- Worked with the CTO to build the gaming portal MVP using React/Tailwind.
- Built a Discord bot to collect and analyze user statistics and improve user engagement.
- Increased daily user traffic by 30% through improving the website's SEO.

Rally (Montreal, QC) - Monetization platform for creators, 100k users Jan 2020 – Jan 2022

Senior Software Developer

- Launched Public/OAuth API gateway project with the Swagger documentation and led a team of 3 developers.
- Achieved API downtime of less than 0.1% by configuring Datadog production monitoring and alerts.
- Increased sales by 90% through implementing the Coinbase wallet as the website's payment method.
- Hired and onboarded new developers, led knowledge-transfer sessions, and conducted peer reviews.

Amdocs (Montreal, QC) - Multinational B2B company Mar 2011 – Aug 2019

Software Developer

- Developed, customized and maintained software products for large telecom operators in Canada and LATAM.
 - Gained experience working with corporate clients to address their specific business needs.
 - Analyzed and investigated production failures while improving the performance of key system components.
-

EDUCATION

Technion – Israel Institute of Technology, Haifa, Israel

Sep 2006 – Aug 2010

B.Sc. in Computer Science
